

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$309 million to more than 7,407 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Colorado

Project Highlight: *Dryland Cropping Intensification Shows Benefits*

In the Great Plains region of Colorado, a scarce supply of water is the chief limiting factor in dryland cropping yields. This concern over limited water availability prompts many farmers in the area to adopt a winter wheat-fallow rotation, yet this approach worsens soil productivity over the long term.

Intensifying production and using no-till could actually improve yields and profitability by building up soil health and improving moisture retention. Using a SARE grant, Colorado State University graduate student Steven Rosenzweig set out to both quantify the benefits of reducing fallow frequency and understand the barriers to adoption. He compared different dryland rotation intensities and found that reducing fallow improved soil health, which ultimately allowed farmers to improve grain production with a similar amount of fertilizer.

He also conducted in-depth interviews with 30 farmers, and identified risk, profitability and crop insurance policy as top perceived barriers to reducing fallow frequency. He also identified strategies for helping farmers overcome the barriers, such as changing the way agronomic researchers approach their work to be more inclusive of long-term viewpoints and profitability. The identified benefits, barriers and strategies for change were widely disseminated, including a website, blog and an upcoming film.

For more information on this project, see sare.org/projects, and search for project number [GW16-020](http://www.sare.org/projects).

SARE in Colorado

western.sare.org/sare-in-your-state/colorado

\$4,885,358
in total funding

102 grant projects
(since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries

SARE Grants in Colorado

Total awards: 102 grants

53 Farmer/Rancher
5 Graduate Student
5 On Farm
Research/Partnership
21 Professional Development Program
18 Research and Education

Total funding: \$4,885,358

\$520,995 Farmer/Rancher
\$123,992 Graduate Student
\$236,989 On Farm
Research/Partnership
\$1,236,286 Professional Development Program
\$2,767,096 Research and Education

Find a complete list of projects on page 3.

SARE's Impact

53 percent

of producers report using a new production technique after reading a SARE publication.

79 percent

of producers said they improved soil quality through their SARE project.

64 percent

of producers said their SARE project helped them achieve higher sales.

Learn about local impacts at:

western.sare.org/sare-in-your-state/colorado

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit western.sare.org/state-pages/colorado to learn more.

For detailed information on SARE projects, go to www.SARE.org

SARE is funded by the USDA's National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.

AGRICULTURE PROJECTS FUNDED IN COLORADO

by USDA's
Sustainable Agriculture Research and Education (SARE) Program

Colorado has been awarded \$4,885,358 grants to support 102 projects, including but not limited to, 18 research and/or education projects, 21 professional development projects and 53 producer-led projects. Colorado has also received additional SARE support through multi-state projects.

RESEARCH AND EDUCATION GRANTS

Project #	Project Title	SARE Support	Project Leaders
SW20-910	Developing sustainable peach orchard soil microbiome management practices to control replant disease syndrome	\$350,000	Dr.Ioannis Minas Colorado State University Dr.Jorge Vivanco Colorado State University
SW18-500	Examining Cover Crops for Soil Health Restoration in Dryland Cropping Systems in SW Colorado and SE Utah	\$249,974	Dr.Steven Fonte Colorado State University
SW15-008	The Feasibility of Cover Crops in Dryland Cropping Systems in SW Colorado and SE Utah	\$249,269	Dr.Abdelfettah Berrada Colorado State University-Southwestern Colorado Research Center
SW14-023	On-farm Cyanobacterial Bio-fertilizer Production to Reduce the Carbon Footprint of Organic Fruit and Vegetable Production	\$293,599	Dr.Jessica Davis Colorado State University
