What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over $309 million to more than 7,407 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, granteeproduced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Hawaii

Project Highlight: Finding Success with Local Fertilizers

Because they rely on imported food, Hawaii and the other Pacific Islands face food insecurity issues. Pacific Island farmers also rely on expensive imported fertilizers with prices that continue to increase substantially. The issue is so important that participants in a 2008 Western SARE listening session in Hawaii ranked replacing imported fertilizers with local resources as the highest research, education and development priority. Local organic sources of nutrients have promise—including compost, tankage (rendered animal products), biochar and seaweeds—but more research is needed on their use.

Three SARE-funded projects on locally produced organic fertilizers are taking a step in that direction. One project evaluated quality, maturity, nitrogen-release pattern and crop growth for 10 composts through a series of lab, greenhouse and on-farm trials. It led to an increased demand for locally produced tankage and a reported increase in taro and sweet potato yields and quality when using invasive algae as a fertilizer.

The second project followed up on the promise of tankage but using it as a solution for fertigation. There was some benefit from using this recipe compared to imported liquid organic fertilizer. The third project is continuing the momentum by evaluating biochar combined with compost.

For more information on these projects, see sare.org/projects, and search for project numbers SW11-055, SW14-026 and SW16-021.

SARE in Hawaii

western.sare.org/sare-in-your-state/hawaii

$6,534,472 in total funding

114 grant projects (since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries
SARE Grants in Hawaii

Total awards: 114 grants

- 3 Enhanced State Grants
- 47 Farmer/Rancher
- 8 Graduate Student
- 11 On Farm Research/Partnership
- 18 Professional Development Program
- 27 Research and Education

Total funding: $6,534,472

- $74,610 Enhanced State Grants
- $684,461 Farmer/Rancher
- $193,938 Graduate Student
- $537,088 On Farm Research/Partnership
- $1,312,047 Professional Development Program
- $3,732,328 Research and Education

Find a complete list of projects on page 3.

SARE's Impact

- 53 percent of producers report using a new production technique after reading a SARE publication.
- 79 percent of producers said they improved soil quality through their SARE project.
- 64 percent of producers said their SARE project helped them achieve higher sales.

Learn about local impacts at: western.sare.org/sare-in-your-state/hawaii

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit western.sare.org/state-pages/hawaii to learn more.

</table>
| GW20-211  | A key to sustainable Hawaiian agricultural production resides with the endemic sandalwood species | $24,997      | Dr. Travis Idol  
University of Hawaii  
Emily Thyroff  
University of Hawai‘i Mānoa  
Emily Thyroff  
University of Hawai‘i |
| GW20-212  | Evaluate sorghum and sorghum-sudangrass hybrids as soil builders and microbial enhancer crops in the tropic. | $25,000      | Dr. Koon-Hui Wang  
University of Hawaii  
Dr. Amjad Ahmad  
University of Hawaii at Manoa  
Roshan Paudel  
University of Hawaii  
Joshua Silva  
University of Hawaii at Manoa, College of Tropical Agriculture  
Philip Waisen  
University of Hawaii  
Roshan Paudel  
University of Hawaii |
| GW19-201  | A Hawai‘i Soil Health Index to Guide Farmer Adoption of Sustainable Management Practices | $23,036      | Jamie (Jayme) Barton, M.A.  
Hawaii Agriculture Research Center  
Dr. Susan Crow  
University of Hawaii Manoa  
Jonathan Deeniki  
University of Hawaii at Manoa  
Elaine Vizka  
University of Hawaii at Manoa |
| GW18-014  | Conditioning Sheep to Avoid Koa Foilage: An opportunity for productive silvopasteres in Hawaii. | $24,920      | Rebecca Ryals  
University of Hawaii - Manoa  
Nicholas Krueger  
University of Hawaii |
| GW18-187  | Quantifying the Environmental Impact of Doubling Hawaii’s Local Food Supply | $21,119      | Dr. Kimberly Carlson  
University of Hawaii  
Tanya Torres  
University of Hawaii |
| GW18-026  | Cover Crop “5-in-1 Approach” for Nematode Management Using Mustard and Oil Radish | $24,998      | Dr. Koon-Hui Wang  
University of Hawaii  
Philip Waisen  
University of Hawaii |
| GW18-104  | Conservation Biological Control of Coffee Berry Borer by Applying Nitrogen Fixing Tree Mulch to Enhance Indigenous Entomopathogenic Nematodes | $24,948      | Dr. Brent Sipes  
University of Hawaii  
Dr. Brent Sipes  
University of Hawaii |
| GW14-007  | Evaluating the Potential of Oyster Mushroom Compost Waste for Plant-Parasitic Nematode Management | $24,920      | Dr. Koon-Hui Wang  
University of Hawaii  
Shelby Ching  
University of Hawaii at Manoa |
