

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$310 million to more than 7,433 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

www.sare.org

SARE: Advancing the Frontier of Sustainable Agriculture in...

Utah

Project Highlight: *Better Onions, Fewer Inputs*

Onions are a high-value crop, but high fertilizer rates and aggressive use of pesticides to suppress weeds, diseases and insects threaten the sustainability of onion production. In Utah, growers and researchers are working to show how changes in management practices can allow farmers to maintain profitable yields while lowering their use of inputs.

In 2013 a SARE-funded team led by Utah State University's Diane Alston studied the effect of certain changes on onion yields, in particular fertilization rates and crop rotations. They were following the lead of a small group of onion producers in the state who were finding they could reduce their use of pesticides by lowering their use of fertilizers and still achieve good yields.

The team pursued multiple objectives and developed a body of information that is helping Utah's producers adopt more sustainable practices. They surveyed nearly 60 farms to better understand production system predictors of pests and yield; conducted field experiments that showed reducing fertilizer rates could reduce pest densities; and created an interactive production modeling tool.

In an assessment of producers conducted near the end of the project, 67 percent said the information they learned would help them diversify their operation, and 80 percent felt it would help them reduce their use of off-farm inputs.

For more information on this project, see sare.org/projects, and search for project number [SW13-034](#).

SARE in Utah

western.sare.org/sare-in-your-state/utah

\$5,448,896
in total funding

74 grant projects

(since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries

SARE Grants in Utah

Total awards: 74 grants

19 Farmer/Rancher
7 Graduate Student
6 On Farm
9 Research/Partnership
32 Professional Development Program
32 Research and Education
1 Research to Grass Roots

Total funding: \$5,448,896

\$115,837 Farmer/Rancher
\$158,111 Graduate Student
\$279,590 On Farm
\$564,531 Research/Partnership
\$564,531 Professional Development Program
\$4,269,668 Research and Education
\$61,160 Research to Grass Roots

Find a complete list of projects on page 3.

SARE's Impact

53 percent

of producers report using a new production technique after reading a SARE publication.

79 percent

of producers said they improved soil quality through their SARE project.

64 percent

of producers said their SARE project helped them achieve higher sales.

Learn about local impacts at:

western.sare.org/sare-in-your-state/utah

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit western.sare.org/state-pages/utah to learn more.

For detailed information on SARE projects, go to
www.SARE.org

SARE is funded by the USDA's National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.

AGRICULTURE PROJECTS FUNDED IN UTAH

by USDA's
Sustainable Agriculture Research and Education (SARE) Program

Utah has been awarded \$5,448,896 grants to support 73 projects, including but not limited to, 31 research and/or education projects, 9 professional development projects and 19 producer-led projects. Utah has also received additional SARE support through multi-state projects.

RESEARCH AND EDUCATION GRANTS

Project #	Project Title	SARE Support	Project Leaders
SW19-905	Can we manage public rangelands for producers and the environment?: Using grazing-duration to balance livelihoods, clean water, sage-grouse habitat, and sustainable forage	\$349,979	Dr.Kris Hulvey Working Lands Conservation Taylor Payne Utah Department of Agriculture's Grazing Improvement Program
SW19-909	Identifying Stacked Conservation Practices that Optimize Water Use in Agriculture	\$349,977	Matt Yost Utah State University Niel Allen Utah State University Dr.Earl Creech Utah State University Neil Hansen Brigham Young University Matthew Heaton Brigham Young University Dr.Bryan Hopkins BYU Ross Spackman Brigham Young University-Idaho
SW18-058	Establishing a protocol for receiving cattle that are at-risk of having a mineral deficiency	\$206,209	Dr.Kara Thornton Utah State University
SW17-046	Grass-birdsfoot trefoil mixtures to improve the economic and environmental sustainability of pasture-based organic dairies in the western U.S.	\$214,123	Dr.Blair Waldron USDA-ARS
SW17-077	Best Management Practices for Regionally-Distinct Populations of the Blue Orchard Bee	\$246,910	Theresa Pitts-Singer USDA Agricultural Research Service
SW15-003	Training cattle to graze medusahead and avoid velvet lupine: A new tool to sustain the economic viability of livestock operations in the Western US	\$249,909	Dr.Juan Villalba Utah State University
SW15-029	Improving Tart Cherry Sustainability	\$230,154	Dr.Brent Black Utah State University
SW14-015	Integrated Byproduct Streams for Enhanced Viability of Combined Dairy Farm and Milk Processing Operations	\$295,688	Dr.Donald McMahon Western Dairy Center, Utah State University
SW13-034	Onion Systems Management Strategies for Crop Nutrition, Weeds, Thrips, and Iris Yellow Spot Virus	\$169,299	Dr.Diane Alston Utah State University

SW10-088	Grass-Legume pastures to increase economic and environmental sustainability of livestock production	\$209,907	Dr.Blair Waldron USDA-ARS
SW08-076	Cultural Management of Onion Thrips and Iris yellow Spot Virus	\$133,441	Dr.Jennifer Reeve Utah State University
SW07-014	Sustainable Vegetable Production: Screening Cover Crops for Water Use Efficiency	\$118,411	Dr.Daniel Drost Utah State University
SW07-035	High Value Crop Rotations for Utah High Tunnels	\$144,495	Brent Black PSC Department, Utah State University Dr.Brent Black Utah State University
SW04-060	Perennial Forage Kochia for Improved Sustainability of Grass-Dominated Ecosystems	\$149,503	Dale Zobel ADVS Dept., Utah State University
SW02-013	Sustainable Water Management for Irrigated Asparagus	\$23,014	Dr.Daniel Drost Utah State University
SW01-020	Production of Drought-adapted Intermountain Native Plants Through Low-cost, In-containers for Emerging Western Markets	\$71,686	Roger Kjelgren Utah State University
SW01-023	Biofumigants in Commercial Onion Production to Enhance Soil Nutrient Availability, Soil Quality, and Control of Weed, Nematode, and Disease Pests	\$134,317	Brad Geary Brigham Young University
SW01-034	Assessment of Value Added Milk from Pasture-based Dairies	\$78,000	Tilak Dhiman Utah State University
SW01-001	Value Added Opportunities from the Manufacture and Feeding of Silages Produced from Liquid Cheese Whey and Other By-products to Growing and Finishing Cattle and Beef Cows	\$59,777	Dale Zobel ADVS Dept., Utah State University
SW00-040	In-house composting in high-rise, caged layer facilities	\$60,975	Richard Koenig Utah State University
SW00-063	Impact Assessment of Western Region SARE Projects	\$38,500	Dr.Rhonda Miller WSARE
SW99-024	The Effects of Altering the Protein Efficiency of Lactating Dairy Cows on the Whole-farm Nitrogen Efficiency of Dairy Farms: Subcontract 1	\$19,184	Allen Young Utah State University
SW99-024A	The Effects of Altering the Protein Efficiency of Lactating Dairy Cows on the Whole-Farm Nitrogen Efficiency of Dairy Farms.	\$89,571	Allen Young Utah State University
SW99-024B	The Effects of Altering the Protein Efficiency of Lactating Dairy Cows on the Whole-Farm Nitrogen Efficiency of Dairy Farms	\$19,184	Richard Kohn
SW98-058	Reducing Chemical Inputs in Arid-Climates Through Sustainable Orchard Management	\$261,044	Schuyler Seeley Utah State University

SW96-032	Identification of Management Practices and Cultivars for Organic Hard-Winter Wheat Production	\$93,911	David Hole Utah State University
SW95-006	A Livestock Production System Less Reliant on the Use of Publicly Owned Lands	\$60,000	Randall D. Wiedmeier Utah State University
SW95-015	Public-Land Grazing Permittees Under Pressure: Sustainability of Coping Strategies on Private Land	\$63,000	D. Layne Coppock Utah State University
LWD93-006	Navajo Nation Whole Farm/Ranch Sustainable Systems Demonstration Project	\$14,000	Lyle G. McNeal Utah State University.
LWD93-034	Four Corners Navajo Nation Sustainable Agriculture Demonstration Project	\$100,000	Lyle G. McNeal Utah State University.
LWD92-005	Conference on the Science of Sustainable Agricultural Systems	\$15,500	David Bezdicek Washington State University

RESEARCH TO GRASS ROOTS GRANTS
