

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$404 million to more than 8,776 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

Sustainable Agriculture Research & Education

SARE: Advancing the Frontier of Sustainable Agriculture in...

Utah

Project Highlight: *Better Onions, Fewer Inputs*

Onions are a high-value crop, but high fertilizer rates and aggressive use of pesticides to suppress weeds, diseases and insects threaten the sustainability of onion production. In Utah, growers and researchers are working to show how changes in management practices can allow farmers to maintain profitable yields while lowering their use of inputs.

In 2013 a SARE-funded team led by Utah State University's Diane Alston studied the effect of certain changes on onion yields, in particular fertilization rates and crop rotations. They were following the lead of a small group of onion producers in the state who were finding they could reduce their use of pesticides by lowering their use of fertilizers and still achieve good yields.

The team pursued multiple objectives and developed a body of information that is helping Utah's producers adopt more sustainable practices. They surveyed nearly 60 farms to better understand production system predictors of pests and yield; conducted field experiments that showed reducing fertilizer rates could reduce pest densities; and created an interactive production modeling tool.

In an assessment of producers conducted near the end of the project, 67 percent said the information they learned would help them diversify their operation, and 80 percent felt it would help them reduce their use of off-farm inputs.

For more information on this project, see sare.org/projects, and search for project number SW13-034.

SARE in Utah

western.sare.org/state-profiles/utah/

\$8,416,327
in total funding

99 grant projects

(since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries

SARE in Utah

Grants awarded 2019-2024

Total awards: **28 grants**

- 6 Farmer/Rancher
- 8 Research and Education
- 5 Professional Development Program
- 3 On Farm Research/Partnership
- 6 Graduate Student

Total funding: **\$3,628,412**

- \$124,518 Farmer/Rancher
- \$2,727,725 Research and Education
- \$445,058 Professional Development Program
- \$156,148 On Farm Research/Partnership
- \$174,963 Graduate Student

Find a complete list of projects on page 3.

Farmer and rancher impacts 2019-2024

SARE grantees have reported the following impacts from their projects:

6,818 farmers participated in a SARE-funded project

1,538 farmers reported a change in knowledge, awareness, skills or attitude

142 farmers changed a practice

Learn about local impacts at:
western.sare.org/sare-in-your-state/utah/

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit western.sare.org/state-profiles/utah/ to learn more.

www.SARE.org

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.

AGRICULTURE PROJECTS FUNDED IN UTAH

by USDA's
Sustainable Agriculture Research and Education (SARE) Program

Utah has been awarded \$8,032,987 grants to support 92 projects, including but not limited to, 37 research and/or education projects, 12 professional development projects and 24 producer-led projects. Utah has also received additional SARE support through multi-state projects.

RESEARCH AND EDUCATION GRANTS

Project #	Project Title	SARE Support	Project Leaders
SW23-950	Impact of including sprouted grains in the ration of beef cattle relative to animal performance, quality and nutritive value of meat, and economic via	\$349,974	Dr.Kara Thornton Utah State University Brady Blackett Blackett Cattle Company Kelly Crozier Raise'm Right Ranch Dr.Matthew Garcia Utah State University Dr.Korry Hintze, PhD Utah State University Dr.Clay Isom Utah State University, Dept. of Animal, Dairy, and Veterinary Sc Dr.Ryan Larsen Utah State University, Dept. of Applied Economics Jason Morgan Morgan Ranching Company Dr.Stephan van Vliet Utah State University
